1 The calculation and publication of the annual DDI to the OeKB will be completed by 7 months following the fund financial period end (i.e. 31 January following the relevant fund financial period end).

2 Following implementation of the German Investment Tax Act 2018, with effect from 1 January 2018, all equity funds of Vanguard Funds Plc will report daily equity ratios to WM Daten on a daily basis. All equity funds of Vanguard Funds Plc will also publish a target minimum equity ratio. Please refer to WM Daten or the Vanguard website for the relevant target minimum equity ratios.

All fixed income funds of Vanguard Funds Plc will not report daily equity ratios to WM Daten, or publish a target minimum equity ratio on the basis that we expect such ratios to be 0%.

3 The calculation and publication of the Italian Reduced Rate Percentage (IRRP) is non-mandatory and is undertaken semi-annually, on a prospective basis. We will target to publish the relevant IRRPs on the Vanguard website by the 15/Jan & 15/Dec as required.

4 The calculation and publication of the annual Swiss tax reporting figures to the Swiss Federal Tax Administration (SFTA) is undertaken annually. We will target to publish the relevant figures with SFTA by 31 March following fund financial year end.

5 The calculation and publication of the annual Excess Reportable Income amounts will be completed by 6 months following the fund financial period end (i.e. 31 December following the relevant fund financial period end). Please refer to the Vanguard website for the relevant information as published in the Report to Participants.

Investment risk information

The information on this document does not constitute legal, tax, or investment advice. You must not, therefore, rely on the content of this document when making any investment decisions.

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.

The fund(s) may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the fund's Net Asset Value. Some derivatives give rise to increased potential for loss where the fund's counterparty defaults in meeting its payment obligations.

Some funds invest in emerging markets which can be more volatile than more established markets. As a result the value of your investment may rise or fall. Investments in smaller companies may be more volatile than investments in well-established blue chip companies.

ETF shares can be bought or sold only through a broker. Investing in ETFs entails stockbroker commission and a bid-offer spread which should be considered fully before investing.

Funds investing in fixed interest securities carry the risk of default on repayment and erosion of the capital value of your investment and the level of income may fluctuate. Movements in interest rates are likely to affect the capital value of fixed interest securities. Corporate bonds may provide higher yields but as such may carry greater credit risk increasing the risk of default on repayment and erosion of the capital value of your investment. The level of income may fluctuate and movements in interest rates are likely to affect the capital value of bonds.
